TOPICS THAT WILL INTEREST YOUR ATTENDEES:

- Approach to implantation in sensitive patients (allergies, aesthetics, systemic influences)
- Clinical differences between titanium and ceramic solutions
- The role of biocompatibility and holistic treatment in the future of dentistry
- Case studies and audience Q&A

Dr. Gregor Hočevar

Dr. Gregor Hočevar is a respected expert in the field of ceramic implantology, renowned for his expertise and innovative approach to dental care.

With years of experience and numerous successful cases, he brings invaluable knowledge and practical insight to this workshop. His main focus is ceramic implants. He completed his M.Sc. on this topic under Prof. Dr. Covani with the thesis "Immediate Implantation of Ceramic Implants in the Aesthetic Zone".

He also developed his own surgical technique to guide the regeneration of soft and hard tissues, enhancing the quality and appearance of soft tissues after immediate implant placement in the visible sector.

He regularly publishes professional articles and gladly shares his knowledge with students, at professional congresses, and with the general public.

His dedication to excellence and passion for teaching make him an ideal mentor for dentists who want to elevate their practice.

Certified specialists for:

SDS SWISS DENTAL SOLUTIONS 

SWISS DENTAL SOLUTIONS

Swiss Dental Solutions is a pioneer in the field of biological dental implantology, based on the use of highly biocompatible zirconia implants. Their solution offers a holistic patient approach, promotes tissue regeneration, reduces inflammation, and ensures top aesthetic and functional results without metals in the body.

With over two decades of innovation, research, and clinical experience, SDS combines science, nature, and Swiss precision. Their passion for education and sustainable treatment ranks them among the leading partners for dentists seeking long-term health for their patients.
