

SDS Zirconia Dental Implant Training

with SDS Ambassador Dr. Gregor Hočevär

Hands-on courses for ceramic implants are held throughout Europe by our SDS Ambassadors. They provide a comprehensive overview of the methods and techniques for case planning and implant placement with SDS ceramic implants, as well as the first practical knowledge of the SDS implant system during a live surgery,

Dr. Hočevär will demonstrate the GH technique developed by him, immediate implantation of the ceramic implant in the esthetic area, from the preparation of the patient to the fabrication of the temporary crown and the postoperative supportive therapies.

Learning objectives at a glance:

- Learn about the unique properties of SDS ceramic implants
- Surgical techniques for successful implant placement with ceramic implants
- The advantages and requirements of immediate implant placement
- Why ceramic implants reduce the risk of peri-implantitis
- Special features of prosthetics with ceramic implants
- Live prosthetic demonstration of implant preparation and scanning for the ceramic crown in the esthetic area.
- Live surgery

Your trainer:

Dr. Gregor Hočevär

Dr. Hočevär is the owner and director of the leading private clinic for metal-free dentistry in Slovenia, where he practices with five dentists. He graduated from the Faculty of Medicine at the University of Ljubljana in 1996, where he was awarded the Prešeren Prize and the Oražen Prize for the best graduate of the generation. In 2017, he was the first dentist in Slovenia to be awarded the title of Specialist in Biological Dentistry and Ceramic Implants. In the academic year 2021/2022, he successfully completed the 2nd Level University Master in Oral Implantology at the International University of Health Sciences in Rome. His main focus is on the immediate implantation of ceramic implants, especially in the esthetic field. He has developed a unique surgical technique to improve the quality and appearance of soft tissue after immediate implant placement. He also regularly publishes peer-reviewed articles in the field of ceramic implants. Dr. Hočevär enjoys sharing his knowledge of biological dentistry with the general public at dental conferences and around the world.
