

SDS SCS

SATELLITE CERAMIC SYMPOSIUM

October 15 & 16, 2025

Ceramic expertise on tour – expertise that comes to you

Excellence begins with experience.

For many, getting started in ceramic implantology is a milestone—for others, it is the next logical step on the path to biologically oriented cutting-edge medicine. What unites them both is the desire for sound, practical expertise—conveyed efficiently.

Because your time is valuable, we bring the knowledge to you.

In an exclusive series of events in thirteen selected cities, we offer you the opportunity to set new trends together with the market leader in ceramic implantology.

(Continued and registration on the reverse side)

Look forward to a **compact training format** that is deliberately designed to be practical and on an equal footing:

- **Hands-on training** with state-of-the-art materials and techniques
- **Professional exchange** with selected experts and colleagues from across Germany
- A **stylish Apéro** creates space for personal conversations and collegial networking in a relaxed atmosphere.

Knowledge that lasts. Experience that connects.

We cordially invite you to be part of this special tour—and to shape the future of implantology together with us.
