

VIVOBASE

CORPORATE CERTIFICATE

CENTER HOČEVAR

This building is VIVOBASE CORPORATE certified.

The VIVOBASE CORPORATE certificate confirms the correct installation and optimal installation of VIVOBASE CORPORATE devices in terms of the effective radius and the associated, complete protection of humans, animals and plants from electromagnetic radiation in this building. VIVOBASE GmbH is convinced that electromagnetic smog is harmful for organisms. VIVOBASE products have been developed for this reason. The state of scientific investigations on the subject of electromagnetic smog is in a state of flux as well as is the scientific assessment of it. Scientific proof of VIVOBASE GmbH in collaboration with the accredited BION Institute, which demonstrates the function and mode of action of VIVOBASE products, can be found on the website www.vivobase.de. The BION Institute is certified according to the SICRIS (Slovenian Current Research Information System) with the registration number 53760410000 as official research center.
